

# Traveler Security

Have a plan in place to keep your travelers **safe and productive**

## Prepare your travelers

for potential risks  
before their trip

Keep track of  
your travelers  
around the world

Connect with  
your travelers  
in the event of a crisis

When the phone rings and there's been an incident, you need to have a plan in place to know where your travelers are, and how to contact them. Making sure employees are safe when a crisis occurs is among the top priorities of every company with business travelers today.

Traveler Security is powered by our proprietary business intelligence platform DecisionSource®. It is designed to help you prepare for and manage risk before and during trips. When a crisis occurs, you have the tools and processes in place to action your plan and communicate with your travelers. Whether your company is large or small, your needs are simple or complex, we're here to help.

1

### IDENTIFY

and reduce your  
travelers' risk before  
the trip starts

2

### BRIEF

your travelers  
so they are  
prepared

3

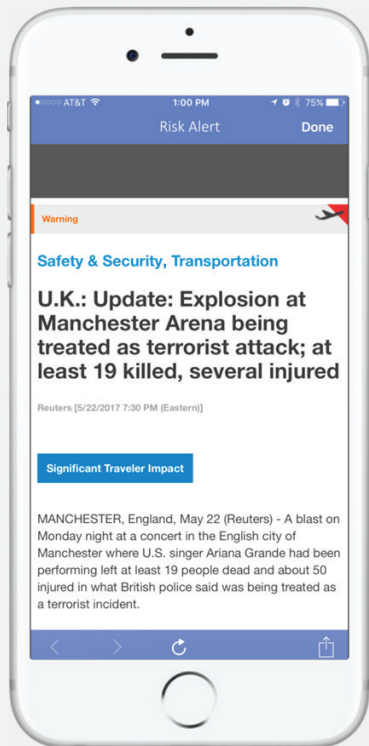

### ALERT

travelers when  
emergencies  
happen

4

### ACTION

your plan with  
the right tools  
and processes

## How it works

Be prepared to help travelers navigate a risky situation, no matter the type of destination or event. With our solution you can:

- Act fast using a color-coded, interactive map showing traveler locations.
- Inform travelers of risks with automated alerts sent through our TripSource® app.
- Receive 24/7 impact alerts and run security reports to help mitigate risks.
- Send SMS messages and emails to communicate directly with travelers.

## What it means to you

- See where travelers and expatriates are booked in a single view so you can respond quickly in case of a crisis.
- Keep travelers informed of circumstances that may pose a threat, and keep the communication going until the situation is resolved.
- Create a plan and put processes in place that align and evolve with your internal security group.

Put your **risk management** plan into action with **DecisionSource Traveler Security**
