

Travel risk management support : high-risk destinations

Over one-third of travelers are unaware of the precautions their company takes for travel to high-risk destinations.

Destination briefings

33%

Obtain vaccines

32%

Safety tools

27%

When **preparing** for trips to high-risk destinations, **travelers most appreciate** destination briefings, pre-trip vaccinations and access to hotels equipped with extra safety features. Almost one-third do not travel for work to destinations they perceive as high-risk.

When asked about the **precautions** their **organization** takes for travel to high-risk destinations, more than one third (36%) of **travelers** seem to be **unaware** of the precautions taken by their organization. This could indicate that the organization does not communicate that type of support, or the traveler simply doesn't have a need for that type of support. Almost one quarter select vetted hotel accommodations, with a further 18% using vetted ground transportation. The least offered precautions are satellite phones and GPS device tracking.
